

KHNES Triage service

*Our referrals manager is the first person to contact if you have any queries regarding referrals to our service. You will receive guidance through the process and explanations regarding the level of support that we offer. We may also suggest some strategies that you may feel able to try before deciding to make a referral to us.

Prior discussion will enable Schools to make the decision as to whether a referral is appropriate or not. In some cases it may be that our service would not be a suitable source of help, but we may provide you with an alternative solution or pathway. A brief discussion beforehand could save you the time and effort of assembling the necessary evidence and paperwork that submitting a full referral requires.
